Fall 2018

AAA elects new officers, board leadership

Five directors were elected to the 2018-2019 American Angus Association® board of directors, as well as a president and chairman and a vice president and vice chairman of the board, during the 135th Annual Convention of Delegates hosted at the 2018 Angus Convention in Columbus, Ohio.

A total of 298 delegates from 41 states and districts represented Association members at the Annual Convention of Delegates and elected the 2018-2019 officers and directors. Directors can serve up to two three-year terms on the board and, if elected, serve additional one-year terms in office as president and chairman and/or vice president and vice chairman.

Elected to his first term is Jim Brinkley, Missouri, and elected to their second three-year terms are James Coffey, Kentucky; Chuck Grove, Virginia; Mike McCravy, Georgia; and Mick Varilek, South Dakota.

GAA's Mike McCravy and his wife, Christy, established MM Cattle Co. with 40 cows and a dream in 1999. Today's operation consists of 165 registered-Angus females along with a commercial cow herd situated in west-central Georgia. During his time on

the American Angus Association board of directors, McCravy has been a member of the breed improvement, activities, and finance and planning committees, and chairs the member services committee. He serves on the Angus Productions Inc. board and represents the Association on the National Cattlemen's Beef Association cattle health and well-being committee.

John Pfeiffer, Jr., Mulhall, Oklahoma, was elected as Association president and chairman of the board. Pfeiffer, who succeeds Kevin Yon, Ridge Spring, South Carolina, has previously served as vice president and vice chairman and treasurer, as well as six years on the board of directors.

Don Schiefelbein, Kimball, Minnesota, was elected by delegates to serve as Association vice president and vice chairman. He has served on the Association board of directors for six years and spent this last year as Association treasurer.

David Dal Porto, Oakley, California, who is currently serving his second term on the board of directors, will serve as the 2018-2019 Association treasurer.

AAA announces top Georgia Breeders who registered most

The 10 producers who registered the most Angus beef cattle in the state of Georgia recorded a total of 2224 Angus with the American Angus Association® during fiscal year 2018, which ended Sept. 30, according to Allen Moczygemba, Association chief executive officer.

The 10 top recorders in Georgia are: Friendship Farms, Canoochee; Wil Mil Farms, Leesburg; Bridges Angus Farm LLC, Lexington; Ankony Angus Corp Inc, Clarkesville; Rocking W Angus, Commerce; Ogeechee Angus Farm, Wadley; Britt Farm, Hartwell; Oakdale Farms, Rome; Fred G Blitch, Statesboro; Potts Bros Farm, Jefferson.

Angus breeders across the nation in 2018 registered 327,067 head of Angus cattle. "Our growth this fiscal year continues to demonstrate strong demand for Angus genetics and solidifies our long-held position as a leader in the beef cattle industry," Moczygemba says. "These results underscore our members' commitment to providing genetic solutions to the beef cattle industry."

Delegates elected to the organization's board of directors, from left, are: James Coffey, Hustonville, Ky.; Jim Brinkley, Milan, Mo.; Mike McCravy, Bowdon, Ga.; Chuck Grove, Forest, Va.; and Mick Varilek, Geddes, S.D. Photo by Eric Mull, on behalf of the American Angus Association.

Letter from your President

Dear Friends and Fellow Angus Breeders -

Greetings! I hope everyone is enjoying some cooler weather finally. First and foremost, I would like for everyone to say a prayer for our fellow cattlemen that were devastated by Hurricane Michael. This will go in the record books as the worst agricultural disaster in Georgia history. There are many places to donate during this time of need. If you are able, please give some thought to this as they sure would appreciate any and all help.

The beginning of November brings the annual American Angus Association Convention. This year's convention was held in Columbus, Ohio. There were a lot of educational opportunities in addition to a world-class trade show to take in. Our very own Mike McCravy was re-elected to the AAA Board of Directors. He's a very deserving candidate that has done a tremendous amount for all Angus breeders. We are blessed to have him as part of the GAA leadership team.

The mission of the Georgia Angus Association is to provide greater marketing opportunities and educational forums for purebred and commercial producers alike. The GAA is in the planning stages for the next spring sale to be held at MM/Glore Cattle Company in Bowdon, Georgia. We would like to have a total of 60 lots represented as elite embryo packages, open and bred heifers, and cow-calf pairs. I encourage all producers to help support this important state event. Everyone will agree that "Rome isn't built in a day", and the same goes for our state association sale.

New this year, GAA will be sponsoring several county cattlemen association meetings around the state. In years past there has been interest in doing some of these meetings to help with producer outreach and education. These meetings will afford the opportunity to help position Angus genetics properly to commercial cattlemen. Kudos to Todd Alford for helping spearhead this endeavor.

We are also preparing diligently for our upcoming GAA banquet. The banquet will again be held at the UGA Livestock Arena. Different from past years, there will be no seminars during the afternoon. Rather, we will hold the business meeting, keynote speaker, and awards recognition during dinner. We hope this will allow for families that may live further way from the Athens area a better chance to attend the festivities.

Please take a second to get to know Dr. Francis Fluharty, the new Department Head of Animal and Dairy Science. He was gracious enough to write a column introducing himself and outlining what's currently going on in the department. Dr. Fluharty is an Angus man and wants our help to reinvigorate the UGA Beef teaching and research herd.

If any of the GAA Board of Directors can be of assistance, please feel free to give us a call. I look forward to visiting with everyone at the upcoming fall and spring bull and female sales.

Best regards,

Andrew McPeake

AAA celebrated achievements in 2018

The American Angus Association® experienced another outstanding year, confirmed by the fiscal year-end report. As improvements in herd quality and performance continued and record amounts of beef were produced, the Angus breed continued to spread influence in the beef industry. The 2018 fiscal year, which spanned from Oct. 1, 2017, to Sept. 30, 2018, recorded 327,067 total registrations for Angus cattle – the 18th largest year in the Association’s 135-year history. The Association and its four entities experienced exceptional growth across nearly all business metrics, and total assets for the organization reached more than \$66.9 million.

“2018 has been another great year for the Association and the Angus breed,” said Allen Moczygemba, American Angus Association CEO. “Our four entities have made tremendous advancements, and the demand for registered Angus bulls continues to show strength.”

The Association introduced its new feeder cattle program, Angus LinkSM, as well as rebranded and expanded USDA Process Verified Programs (PVP) through AngusSource®. Angus Link gives commercial producers the information they need to make their next calf crop better than the last. The program’s three simple scores, backed by the world’s most comprehensive genetic database, enable producers to effectively communicate their calf crop’s genetic performance potential to prospective buyers and help them capture value on sale day.

The comprehensive AngusSource programs and services are aimed at improving profitability in the commercial sector of the cattle industry. Program options include Age and Source, Non-Hormone Treated Cattle (NHTC), AS-NeverEver3 (AS-NE3), AS-Cattle Care and Handling (AS-CCH) and AS-Calf Management (AS-CM).

Finally, a new MaternalPlus® rebate program resulted in a 21.9 percent increase in the number of cows enrolled in the program. MaternalPlus is a voluntary, inventory-based reporting system designed to capture additional reproductive trait data and, ultimately, expand reproductive and lifetime productivity tools.

Pledged to Progress

Fiscal year 2018 confirmed the dedication Angus Genetics Inc. (AGI) has to bettering the Angus breed through research by launching new programs, hitting major milestones and continuing the focus on improvement. This year, AGI released two new foot score research expected progeny differences (EPD) – the first of their kind in the U.S. for beef cattle. With breeder-reported scores on claw set and foot angle, an initial research analysis allowed for development of the appropriate genetic evaluation model to predict foot score selection tools.

AGI also launched Angus GSSM and HD50K™ for Angus. Angus GS is the first Angus-specific genomic profiler, which facilitates genomic selection and accelerates breeding progress for producers by using a broad array of research markers. HD50K for Angus is a new genotyping platform developed specifically for Angus seedstock producers. Both profiles are designed specifically for the Angus breed and represent a significant reduction in cost for members. Additionally, AGI made history in 2018 by

surpassing 500,000 genotypes in the database, with more than 540,000 by the end of the fiscal year – more than three times the next largest beef genomic evaluation. Genomic tests submitted during fiscal year 2018 grew by 28 percent from the last fiscal year, totaling more than 162,000 tests.

Media Momentum

Angus Media, a for-profit entity of the American Angus Association, achieved major milestones during fiscal year 2018. Both the Angus Journal® and the Angus Beef Bulletin® unveiled dramatic new designs, which were met with great acclaim.

Print production still remains a staple at Angus Media. Targeted to the Association membership, the Angus Journal maintains a paid circulation of 13,000. The Angus Beef Bulletin, a publication catered to commercial producers across the country who are highly active in the Angus business, continues to be one of the industry’s largest-circulated publications with 65,000 subscribers.

Angus Media has a growing online presence to accompany its print publications. Angus Journal Daily and Beef Bulletin Extra reach an extensive online audience with 7,500 and 4,300 e-blast subscribers, respectively. Additionally, the Angus Journal has accumulated more than 14,500 likes on its Facebook page.

Digital marketing also became a focus area for Angus Media this year. A soft launch of Angus Sales TV in January 2018 prompted a 26 percent increase in online sale book views from spring 2017 sales. Digital sale book page views, which now offer a video clips feature, are now at 42 million. This year also saw a transition in the way ads were served and appear on angus.org to bring the most accurate website data and allowed Angus Media to provide more creative consumer reports, and retargeting became an offering for advertisers, as well.

Connecting the Crowd

The communications group continues to make advances in Association-wide communications efforts by expanding the Association’s digital presence. The Association ended the year with 111,000 likes on Facebook, 15,600 Twitter followers, 23,700 Instagram followers and 857,000 YouTube views. Angus.org generated 29.5 million views, and the Association sent out 186 news releases to keep members up to date with Association news.

2018 marked The Angus Report’s seventh year on RFD-TV. With 52 episodes aired, the 30-minute show, which is a leading source of industry news for cattlemen and women across the country, generated an impressive 1.9 million views on RFD-TV.

Two full-length I Am Angus documentaries were released this year – “I Am Angus | Fabric of Our Forebears” and “Raising the Steaks”. “Raising the Steaks” appeared on RFD-TV on Thanksgiving Day and followed one consumer couple as they learned about the beef production process by touring the entire beef production chain. “I Am Angus | Fabric of Our Forebears” dove into the rich heritage of the Angus breed and the varied people who now raise Angus across the world. From the original Aberdeen-Angus herds

Meet the new UGA Animal and Dairy Science department head

Dear Georgia beef producers,

Please let me introduce myself and let you know why I'm so excited to join the University of Georgia as the department head of Animal and Dairy Science. First, and foremost, it was the University of Georgia's strong commitment, and connectivity, to the Land Grant System that drew me to this job! I grew up on a commercial cow-calf and stocker operation in eastern Ohio. I was active in 4-H, and I was on Ohio State University's meat judging and general livestock judging teams. After graduation with my bachelor's degree, I became the beef feedlot manager at Ohio State, and I completed my master's and doctoral degrees while being a full-time employee. After I received my Ph.D., I was put on the faculty at OSU, where most of my research involved investigating the nutrition and rumen microbiological changes of stressed, newly-weaned feeder cattle, the protein and energy requirements of growing cattle and sheep, and nutritional manipulation for enhanced marbling and feed efficiency.

I was also heavily involved in Extension, and my primary Extension programming was through the creation of both cow-calf and feedlot management schools throughout Ohio. These schools required producers to pay for and attend a four-week course with 12 hours of instructional time. Over 900 beef producers attended these management schools, and were awarded the Ohio Professional Beef Producer designation by the Ohio Cattlemen's Association, where I served on the board for six years. I taught Beef Production at Ohio State for 20 years, as well as a course in research methods, and I co-instructed a course in branded foods development. I own purebred Angus and Wagyu cattle, and I'm committed to the Land Grant Mission of service, and providing useful, scientifically validated information to farming and ranching families.

I see great potential at the University of Georgia, and I intend on helping to create more opportunities for our students to be involved in experiential learning, undergraduate research, and study-abroad programs. The Animal and Dairy Science department has one of the best genetics groups in the world, and we're in the process of hiring a reproductive physiologist with an Extension and teaching appointment, as well as a muscle biologist with a research and teaching appointment. I want to have short courses and programming that teaches producers how to use the latest genetic and reproductive tools to make sound breeding decisions using advanced reproductive techniques. This will include an emphasis on nutrition of the dam and fetal programming, too, as muscle and fat development begin before calving. We have some exceptional young faculty, as well as experienced faculty who bring a wealth of knowledge to our classrooms and Extension programs.

With your help, I want to bring our facilities up to date so that we can monitor individual animal feed and water intake. This will be critical to teaching students about feed intake, growth and development, and feed efficiency, as well as allowing us to conduct research

in areas like animal health and welfare, and heat stress. I am going to put an emphasis on having our undergraduates compete on meat and livestock judging teams, as these are excellent ways to teach decision making, and allow our students to see the differences in product quality in the meat area, as well as teaching how growth and development can be visualized through indications of muscling and fatness, as well as the necessity to have cattle that are structurally sound.

Fluharty

When you see me at events, please come and say hello. If you want to contact me, my e-mail is fFluharty@uga.edu. If you want to support our efforts to strengthen the department's beef and meat research efforts, we have a new University of Georgia Foundation Fund, 'Animal and Dairy Science Beef and Meat Research and Teaching' (fund number: 9026100). The Animal and Dairy Science Beef and Meat Research and Teaching fund is now set up for online donations. Online Giving Link: <https://tinyurl.com/UGAADS>. Users have the option of making a one-time gift or signing up for a recurring gift via credit card. If you want to learn more about this fund or other funds to support our department, including in-kind donations that advance our mission, please contact me.

Thanks.

Francis Fluharty

GAA makes donation to hurricane victims

Hurricane Michael had a devastating impact on many of our cattle producers in South and Central Georgia. Cattle producers have lost barns, silos, fences and the list goes on and on. The Georgia Cattlemen's Foundation set-up a program to accept tax-deductible donations to aid in the relief effort following from Hurricane Michael!

The Georgia Angus Association was pleased to make a \$2,500 for this effort.

One hundred percent of the donations to this fund will be dispersed to Georgia farmers and ranchers across the state that have been affected by this devastation.

If any individual, company or organization would like to join in sending monetary donations as a relief, we will collect the funds and pass the donations made through the Georgia Cattlemen's Foundation a 501(c)(3) organization. All contributions to the Georgia Cattlemen's Foundation are 100% tax deductible. Please send payments to Georgia Cattlemen's Foundation, PO Box 27990, Macon, GA 31221 with the memo reading Wildfire Relief.

GAA seeking nominations for the
Georgia Angus Spring Sale
Saturday, March 23, 2019
Hosted by MM Cattle Co., Bowdon, GA

Requirements for Participation

1. Each consignor must be a member in good standing of the Georgia Angus Association.
2. Priority on consignments: 3 in 1 packages (cow with a newborn calf at side or cow soon to calve along with yearling heifer); and cow with weaning age heifer calf at side. Cows with bull calves and excellent quality bred or open heifers will also be accepted. No single bulls may be consigned. It is strongly suggested that cows be A.I. sired with A.I. calves by side.
3. Maximum age on cows is 6-years-old.
4. Heifers born prior to December 1, 2017 must be examined safe in calf.
5. Cows with calves by side born prior to January 1, 2019 must be rebred and examined safe in calf if time permits.
6. Frozen embryos and pregnant recipients from very select matings of superior quality and a limited amount of rare semen will be accepted at the discretion of the committee.
7. Cattle will be screened prior to the sale - usually in January. Consignors will be notified of the screening schedule prior to any visits.
8. Selection of cattle will be based on type and depth of pedigree. Quality, performance and EPDs will be the number one priority.
9. Original Registration certificates must be signed and turned over to the Georgia Angus Association, if selected for the sale, before sale date.

**For more information, contact:

Champions named at Georgia National Fair Junior Show

Georgia junior Angus exhibitors exhibited their animals during the 2018 Georgia National Fair Junior Angus show October 6 in Perry, Ga. Joel Judge, Leonard, Texas, and Ashley Judge, Loveland, Colo., evaluated the 39 entries. Jesse Cronic had an awesome day where he

exhibited the grand champion and reserve grand champion Angus heifers. He went on to be named with the Reserve Supreme Heifer honors with his Angus entry. Congratulations to Jesse and all the Angus exhibitors that participated.

Horstman LAH Empress 708E won grand champion female at the 2018 Georgia National Fair Junior Angus Heifer Show. Jesse Cronic, Braselton, Ga., owns the January 2017 daughter of P R Black Friday 0244.

PVF Missie 7303 won reserve grand champion female. Jesse Cronic, Braselton, Ga., owns the September 2017 daughter of C&C Priority 1428B EXAR.

AAA celebrated achievements in 2018, *continued from page 3*

in Scotland to the plains of South Dakota, down to the bayou and everywhere in between, the Angus story was told from eight breeders' perspectives.

Fostering the Future

The Angus Foundation, the 501(c)(3) not-for-profit arm of the American Angus Association, has a rich history of support for the future of Angus education, youth and research. This year, more than \$1.5 million in contributions and support was received from generous donors and funding sources.

At the 2018 National Junior Angus Show in Madison, Wisconsin, the Angus Foundation presented 111 undergraduate and graduate scholarships, totaling more than \$225,000. In addition to scholarship support, the Angus Foundation worked directly with the National Junior Angus Association board of directors to financially support the inaugural State Training and Angus Retreat (STAR) Conference, Leaders Engaged in Angus Development (LEAD) Conference, Angus/Talon Youth Educational Learning Program Internship, Angus Ambassador and Raising the Bar programs. These educational and leadership training conferences help develop the youth of the Angus breed and prepare Angus youth to be the future leaders of the industry.

To encourage adult education, the Angus Foundation supports the Beef Leader's Institute (BLI), Cattlemen's Boot Camp, Women Connected Conference and Young Cattlemen's Conference (YCC).

The Angus Foundation also continues to invest in key research conducted with industry partners. Since 2005, the Foundation has invested more than \$1.4 million in research ranging from eating experience to reproduction and growth performance. These continued research efforts are performed with producers in mind as they have the potential to drive breed improvements and Angus breeders' future decisions.

Certified Angus Beef Celebration

Certified Angus Beef LLC (CAB) commemorated its 40th anniversary by selling 1.21 billion pounds of CAB product for the year. Sales increased by 8.1 percent from last year, while a new monthly record was established in August when 112.7 million pounds were sold. Almost 19 percent of all fed cattle harvested qualified for the brand, and on average, nearly 100,000 head per week qualified as CAB.

Additionally, CAB set sales records in all 12 months of the 2018 year. This included seven out of the 10 best sales months in the brand's 40-year history, including August, which proved to be the most successful sales month ever recorded.

Save these GAA dates

Annual Meeting and Banquet

The Georgia Angus Association Board of Directors (GAA) is pleased to announce the date for the GAA Annual Meeting and Banquet. The 2019 events will be held on Saturday, March 2 back at the UGA Livestock Arena in Athens, Ga.

Please be on the lookout in January for the opportunity to sign up for these great events! All Georgia Angus members and Angus enthusiasts are invited to attend!

Spring Event Sale

The second annual GAA Spring Event Sale will take place on Saturday, March 23, 2019 at the MM Cattle/Gore Sale Facility in Bowdon, Ga.

The GAA is currently taking nominations for this sale. If you are interested in consigning cattle to the sale, please complete the enclosed nomination form and return to the GAA office.

Southern National Junior Angus Show

June 9, 2018 • Perry, GA • Judge: Zach Bartenslager, Knoxville, Tenn.,

BRF Mable 653D won grand champion owned female at the 2018 Southern National Junior Angus Show. Austin Ertzberger, Carnesville, Ga., owns the November 2016 daughter of PVF Insight 0129.

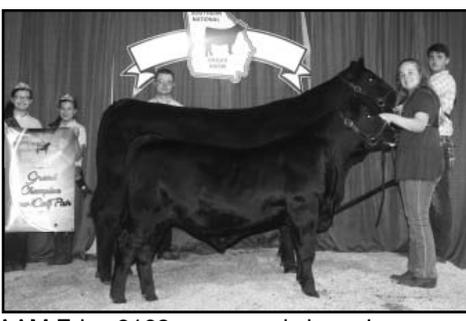

Judge L/L Vixon 7114 won reserve grand champion owned female at the 2018 Southern National Junior Angus Show, June 8 in Perry, Ga. Kade Mitcham, Covington, Ga., owns the March 2017 daughter of Colburn Primo 5153.

Birge Farms Blackcap 523E won grand champion bred-and-owned female. Case Birge, Graceville, Fla., owns the October 2017 daughter of Coleman Charlo 0256.

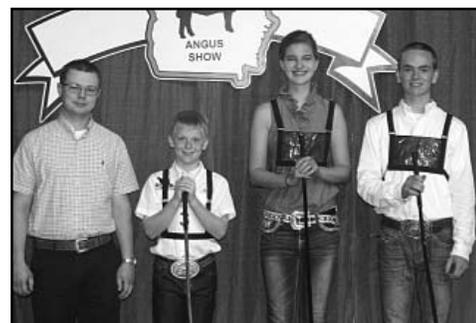

Miss Belsey Boo E347 won reserve grand champion bred-and-owned female. Janna Anderson, Elberton, Ga., owns the January 2017 daughter of SAC Conversation.

AAM Erica 3162 won grand champion cow-calf pair. Case Birge, Graceville, Fla., owns the March 2016 daughter of PVF Insight 0129. A January 2018 bull calf sired by Coleman Charlo 0256 is at side.

MB Forever Lady 1616 won reserve grand champion cow-calf pair. Morgan Blommel, Dade City, Fla., owns the February 2016 daughter of Silveiras Style 1530. A February 2018 bull calf sired by Colburn Primo 5153 completes the winning pair.

These young Angus enthusiasts won top honors in their division of showmanship. Pictured from left are Zach Bartenslager, judge; Owen Austrino, Dade City, Fla., novice champion; Blaire Beasley, Doe Run, Ga., intermediate champion; and Austin Ertzberger, Carnesville, Ga., senior champion.

Birge Farms Maximus 315E won grand champion bull. Case Birge, Graceville, Fla., owns the September 2017 son of Coleman Charlo 0256.

AA Primo 771 won reserve grand champion bull. Owen Austrino, Dade City, Fla., owns the January 2018 son of Colburn Primo 5153.
